### SOLVING TRIG EQUATIONS

Strategy 6: Solve Trig Equations by using inverse trig functions, CAST diagrams and a calculator. Express your answer as a radian measure and round to the nearest thousandth. Give the solutions on  $[0, 2\pi)$

Equation	Principal Value (get this from calculator)	Appropriate Quadrant (from CAST diagram)	CAST Diagram	All Solutions On $[0, 2\pi)$
Example: $\sin(x) = -0.431$	$\sin^{-1}(-0.431) = -0.4456$	Sine negative in QIII and QIV		Q $x = 2\pi - .4456 = 5.838$ Q $x = \pi + .4456 = 3.587$

$\tan(x) = 4.25$	$\tan^{-1}(4.25) = 1.3397$	tan positive in QI, QIII		QI $x = 1.3397$ QIII $x = \pi + 1.3397 = 4.4813$
