

Accessing ArcGIS using Virtual Lab

1. Go to <https://its.georgiasouthern.edu/virtuallab/>
2. Follow the 7 instructions on this page. The instructions are also in a pdf document called "Virtual Lab Instructions" on the page. Make sure to select "Full Lab" instead of "GPU Lab", as it is only installed on "Full Lab".
3. Once the virtual lab is set up and you are logged in, you can simply search for ArcCatalog/ArcMap in the windows search and use it as normal.
