

## Student Assistantship Opportunity

Dr. Marcus Marktanner (Professor of Economics and International Conflict Management), <https://facultyweb.kennesaw.edu/mmarktanner/index.php> is looking for a student who is working with him on a data visualization project. The ideal student would be proficient in:

- HTML
- CSS
- Java script, JQuery
- Google charts, chart.js and others
- Possibly database

The project is mostly a front-end development project. The student would meet with me once a week for an hour or so, and work otherwise independently. The student would be paid USD 3,000 through the Bagwell Center (<https://coles.kennesaw.edu/econopp/index.php>).

The preliminary project title is "Analyzing, Comparing, and Simulating the Economic Impact of Economic Freedom around the World."

The final delivery is a website that is similar to these:

<https://coles.kennesaw.edu/econopp/economicfreedomdividend/>

<http://almuthmerkel.com/SMEX/>

<https://codepen.io/schbaeddzle/pen/QWNVwPV>

If you are interested, please contact Dr. Marktanner directly by email ([mmarktanner@kennesaw.edu](mailto:mmarktanner@kennesaw.edu)) to set up a Teams meeting to learn more about the project.

Thank you!
