## **1c Case Study Meiosis**

### **6 Onion Root Tip Mitosis**

Adapted from:

Babich, H., Segall, M.A. and Fox, K.D. (1997). The Allium Test—A Simple, Eukaryote Geneotoxicity Assay. *The American Biology Teacher*. 59, 580-583.

Stain preparation: 5 g of orcein is added 150 ml of hot acetic acid. Keep the stain solution in a dark bottle for 2-3 days, shaking several times to saturate the solution. After that treatment, add 150 ml of distilled water, filter and store in a dark bottle. (Babich, Segall and Fox, 1997)
