8. What have you liked best about the Hyflex / Extended Classroom model as a response to social distancing requirements due to COVID-19 this semester? (Type N/A if you are in an asynchronous online class)

53 responses

N/A

I liked that we could go at our own pace

I liked that we did have the option to come into class if we so desired and that it was limited (despite myself personally never attending in class due to COVID concerns). I think the online sessions were handled well.

The class lectures online felt like we were in person, very interactive.

Being free to watch the lectures on my own time.

It's easier for me to attend classes and lectures online and still being able to engage with group activities

i liked in person more.

It was difficult at first

It was nice.

9. What did you not like about the Hyflex / Extended Classroom model as a response to social distancing requirements due to COVID-19 this semester? (Type N/A if you are in an asynchronous online class)

N/A

n/a

It was harder to ask for help and get it

I had issues with the group format of the class as group work is much harder over online, especially when people can just mute themselves and not offer any participation.

No observations made.

I did not like having to switch professors. Only because I'm not used to the way that they teach.

it was easier in the sense you can do it anywhere

I needed a little assistance at times

i feel like classes are too short sometimes. like it goes too fast.

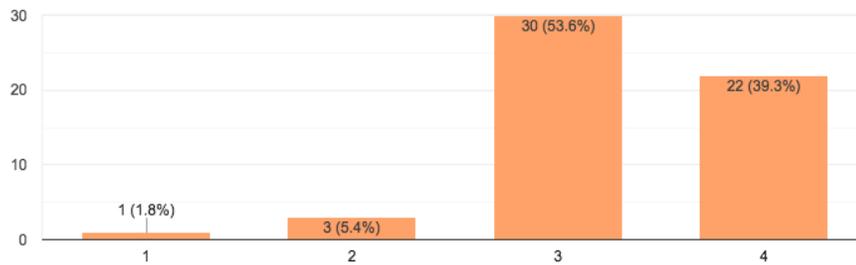

10. What suggestions do you have for improving this course while maintaining social distancing (if in-person) or in general (if online)?

51 responses

- None
- N/A
- Make it more easy for the professor to talk to students while in groups
- more time going over material with the professors.
- n/a
- I enjoyed the class this semester.
- Have group activities that actually relate to what's going to be on the quizzes
- more lecture
- nothing really.
