Module 3- Managing IT Risks

Being successful in this course requires you to review, evaluate, and manage IT risks. Mastering and using fundamentals of human computer interaction (HCI) and human factors are key capabilities in successfully managing IT risks. This exercise intends to aid you in doing so.

Readings for this module:

Readings for this assignment:

- Selected readings on the web for deepening, etc.
- Links from the LM3 Readings ReadMe
- Optional: Materials you developed and/or used from prior or current courses, focusing on those from the BSIT or BASIT

Module Objectives- LM3 Managing IT Risks

The content and learning activities in this module will help you achieve course level objectives 2, 3 and 4 as listed in the syllabus. Specifically, upon completion of this module, you will be able to:

- Construct an evidence-based approach to manage IT risks
- Explore details of a relationship between the management of IT and HCI for managing IT risk using a standardized framework such as the NIST Cybersecurity Framework.

Task List- Actions/Deliverables for this Module:

- Read as per above
- Download the Assignment Folder A3 file and edit in your responses within the file (leaving all questions and formatting intact). Please save file.
- Deliverable: Upload your response file using the A3 Assignment Folder in D2L
- Deliverable: Make entries on the Module 3 Discussion
