

HUMN1201 Review Questions Units 3-4

This review guide is meant to help you revisit concepts we've already gone over to make sure you fully understand them before we move on to the next unit. Because each unit builds on the older ones, it is VERY important to fully understand each key concept before moving forward—so, take this review very seriously.

In order to complete this, review your quizzes, homework assignments, readings, videos, and notes.

1. What is a statement?
2. What is an argument?
3. What are the two main parts of an argument? Define them EACH.
4. What is the standard argument form, and how is it useful?
5. What is an argument map, and what information does it provide that the standard argument form does NOT?
6. What are missing or unstated premises?
7. What is truth content? Logical relationship?
8. What is a deductive argument?
9. What are the six different types of syllogisms? Can you identify an example for each?
10. What is a valid argument?
 - a. Do the premises have to actually be true for the argument to be valid?
11. What is a sound argument?
 - a. Do the premises have to actually be true for the argument to be sound?
12. What is an inductive argument?
13. What is an analogical argument?
14. What is an enthymeme, and on what future assignment will you need to create one of your own?
